## Everything Need to Know Before Getting Feet Wet

- Where to find course related information
  - www.trustie.net (Trustie platform)

- Where to host your project and code
  - Project management at Trustie
  - Code management at Trustie with GitLab

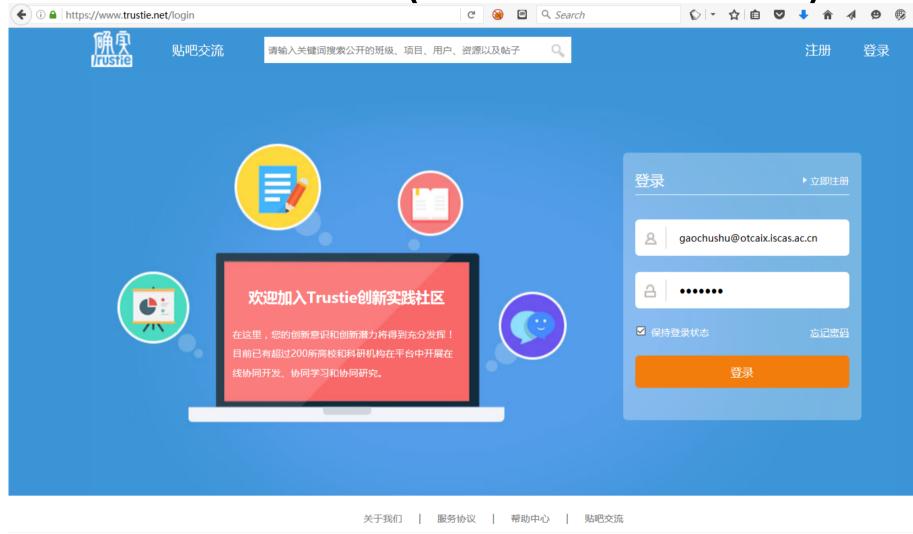

- Where to develop your apps
  - Cloud9 (c9.io)
- Where to deploy your apps
  - Heroku (www.heroku.com)

# Your Course Is Here Trustie Platform (www.trustie.net)

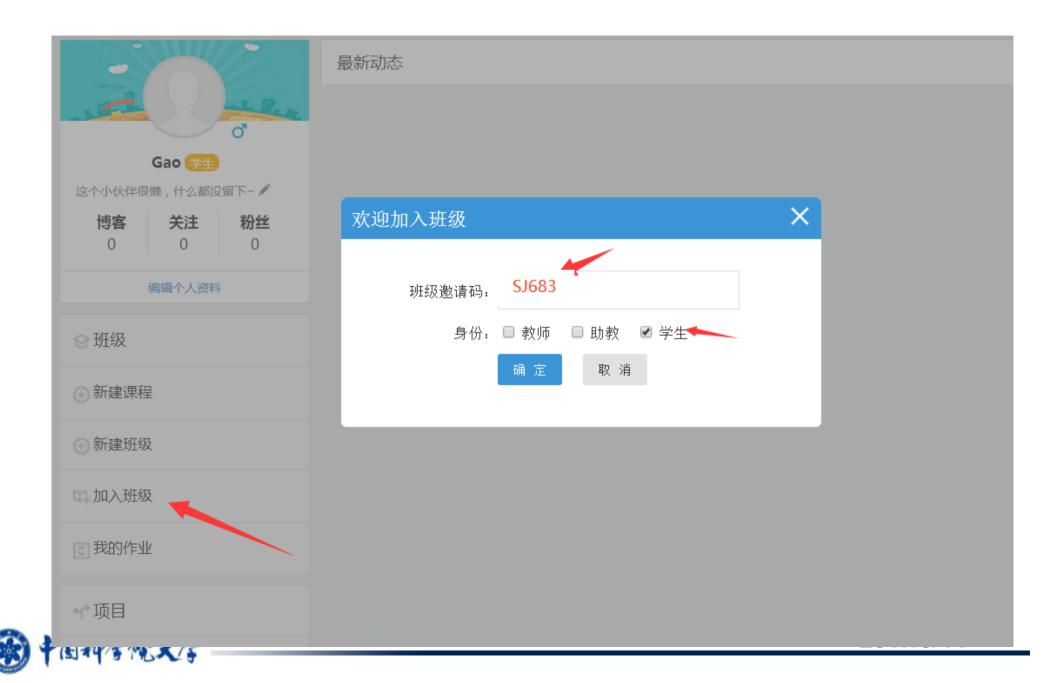

## Register

- Register in the platform
  - Your REAL name
  - Your student ID number

### Join the Course

#### Your Homework Is Here

- Regularly check the platform
  - Notification what is going on
  - Homework what is the deadline
  - Repository keep you personal artifacts (code, doc, homework, etc.)
  - Discussion talk to other
- Taste all the functions and have fun

## Project and Code at Trustie

- Once there is a homework assignment
  - You can create project in your Git repository @ Trustie (read trustie help)
  - You can link your code in Git repository to the homework assignment
- If you are not sure how to do, ASK TAs or lecturers

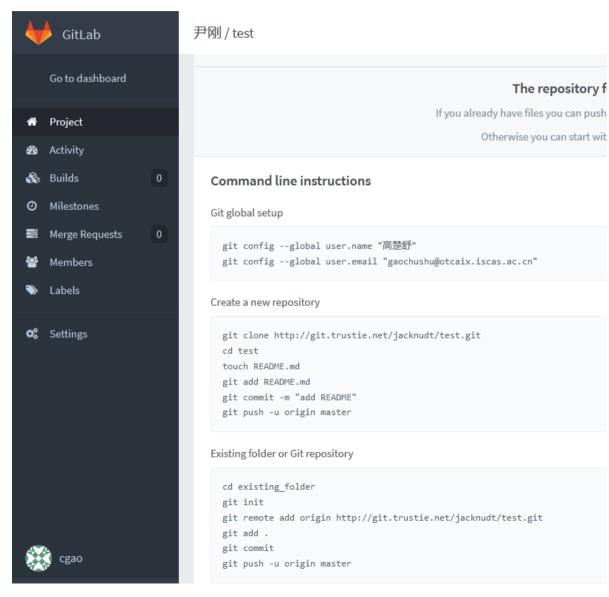

## Project and Code at Trustie

- For team-based homework and project
  - Team leader create project in Git@trustie
  - Team leader add team members
  - Team leader link code to the homework
- If you are not sure how to do, ASK TA or lecturers

#### How To Check Your Code

- Refer to any Git book or online resources
  - Know the basic flow of git
  - Know the meaning of local repository/ remote repository
  - Know how to push/pull/clone
- Your will use it to manage your homework and course projects

## Your Environment Setup

- Cloud9 online IDE(recommended)
  - If you already have a c9 account, tell TA your username or email address
  - If not, leave an email address to TA, you will be invited to join a shared University account(UCAS SE 2017 fall)
  - more instructions see:
     https://github.com/saasbook/courseware/wiki/
     Setting-up-Cloud9
- If you want setup environment on your own computer (at your own risk;-)
  - https://github.com/saasbook/courseware/wiki

## App Deployment at Heroku

- Create account at <a href="https://www.heroku.com/">https://www.heroku.com/</a>
- Try tutorial of Ruby
  - https://devcenter.heroku.com/articles/gettingstarted-with-ruby#introduction
- You may need to install other tools according to the OS used
  - heroku toolbelt CLI for Heroku apps management
  - git

#### Check List Before Your 2<sup>nd</sup> Class

- an account of Trustie
  - make sure your name/student ID are correct
  - try to play with your Git repository@trustie
- join the course
  - course invitation code: \$J683
- an account of <u>Heroku</u>
  - make sure your heroku app is accessible
  - know basic command of heroku
- an environment for ruby on rails
  - check ruby installed (e.g.: command#: ruby -v)
  - check rails installed (e.g.: command#: rails -v )

#### And More...

- Trustie platform is under development
  - READ user guide
    - https://www.trustie.net/organizations/1/downloads
  - TRY everything you could
  - POST if you have any problems in discussion area on Trustie
- Software engineering course is under development
  - SHARE every findings in the discussion area
    - How to setup environments
    - How to use git
    - How to use heroku
    - How to program with ruby
    - How to develop with rail
    - ...
  - GIVE feedback about the course, homework, and anything related to SE

#### Who to Ask

- Lecturers
  - Jun Wei 魏峻 (wj@otcaix.iscas.ac.cn)
  - Chushu Gao 高楚舒 (gaochushu@otcaix.iscas.ac.cn)
- Student TA
  - Huazhe Tan 谭华哲
- Ask @ Trustie
  - •讨论区@高级软件工程2017秋季
- Ask @ QQ group
  - Group number (257913763)
